Card maths game : First To 100

This simple game is perfect for getting your children practising their addition skills in a fun and exciting way!

What you need to play:

- A deck of playing cards
- A sheet of paper

How to play:

Step 1: Shuffle a pack of cards and place face down. Each player takes one card and turns it over in front of them.

Step 2: Record the number on the card (Ace is worth 1 and picture cards are worth 10).

Step 3: Each player then takes a second card and adds the number to the first number, recording it on the paper.

Step 4: Keep taking cards until the first person reaches 100. They are the winner.

To make the game more challenging you could begin at 100 and subtract the card values.
